

React.js Developer (Experience- 2-5 yrs)

About the job:

- What is the toughest computer science problem that you have ever solved! While coding does you ever think why the CPU of your program gets increased on times! When you have designed the data structures, do you target achieving logarithmic time complexity, because if you think quadratic, the scale at which we run, it would never be able to finish its respective loops! While designing the data pipelines, have your producer's & consumer's codes ever witnessed RAM grown issues!

- Do you like to work in multiple programming languages! Have you ever tried solving loop unwinding and loop unrolling in real-world problems! Have you ever designed UI that made users awestruck! Have you ever thought of writing your own diffing and reconciliation algorithm for updating DOM! We at GTROPY solve a plethora of such engineering problems, if the above ramblings dazzle you, GTROPY is certainly for you. And the above ramblings are not the questioned marks, they are exclamations!
